

SmartProcure Corporate Procurement Policy (2026)

Document Reference: POL-PROC-2026-V1.0

Effective Date: January 1, 2026

Approved By: VP of Finance & Global Operations

This document outlines the mandatory compliance standards and criteria for all procurement activities related to office facilities, IT equipment, and enterprise renovations at SmartProcure Enterprises.

1. Financial Spending Thresholds

The maximum allowable budget for department-wide workspace or office furniture upgrades is set strictly at **\$50,000 USD**. Any quotation exceeding this maximum spending threshold will trigger an automatic compliance rejection and require direct authorization from the Chief Operating Officer (COO).

2. Vendor Pricing and Payments

Standard payment terms for SmartProcure Enterprises are net payment terms, specifically **Net 30** or **Net 60**. Advance payments are heavily discouraged to mitigate vendor risk. Upfront or advance payments must not exceed **10%** of the total Contract Value. Any advance payment request higher than 10% requires written approval from the Vice President (VP) of Finance.

3. Delivery SLA Standards

Timely project execution is critical. Vendor delivery and installation schedules must be completed within a maximum of **45 calendar days** from the official Purchase Order (PO) issuance date. Proposals exceeding a 45-day delivery timeline will be flagged as high risk during evaluation.

4. Warranty & Support Clauses

To guarantee asset durability and minimize maintenance overheads, all equipment, products, and services procured must come with a minimum warranty duration of **12 months** (1 Year). Extended warranty terms are highly preferred and will positively influence the vendor risk evaluation score.

5. Environmental and Sustainability Standards

SmartProcure Enterprises is committed to carbon-neutral operations and environmentally friendly sourcing. Preference is explicitly given to suppliers holding verified environmental or quality management certifications: **ISO 14001** (Environmental Management Systems) or **BIFMA Certification** (Business and Institutional Furniture Manufacturers Association) or **ISO 9001** (Quality Management Systems).

Furthermore, the utilization of medium-density fiberboard (MDF) contains hazardous resins and is discouraged for office work surfaces. Heavy-duty desktops must utilize sustainable Solid Wood or High-Pressure Laminate (HPL) materials to meet durability and environmental mandates.
